

Skills Bootcamp in Green Energy: Warehouse & Logistics

Warehouse and Transport is the UK's fastest growing industry.

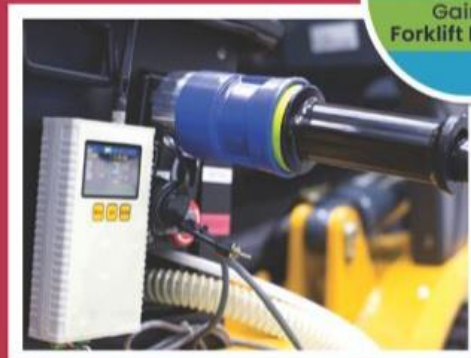

The sector is going through significant change with Net Zero and decarbonisation high on the agenda for the majority of the UK's largest employers.

Join our two-week course and gain a thorough understanding of how the sector is changing, why it's important and providing you with the skills to become highly employable within a warehouse that is pushing towards Net Zero:

- ✓ Why electric forklift trucks and HGV's are replacing diesel and gas.
- ✓ How to properly maintain and operate an electric forklift truck.
- ✓ Electric forklift battery care and maintenance to ensure minimal downtime.
- ✓ Waste management.
- ✓ Environmental sustainability.
- ✓ Health & Safety within a warehouse environment.

2 Week Course

Gain a Forklift Licence

✓ **Guaranteed job interviews locally**

Face to face learning with specialist tutors

"DHL Supply Chain is committed to achieving 100% net zero-carbon warehousing by 2025."

"Wincanton's strategy for improving its impact on the environment is centred around a commitment to provide net-zero supply chain solutions across waste, property and fleet. Group target of net-zero by 2040"

"GXO are on track to meet or exceed the goal of carbon neutral by 2040"
