

Could you help with research to support people with dementia and carers from minority ethnic groups?

Do you identify as African, Caribbean, Indian, Bangladeshi, or Pakistani?

- Are you someone living with dementia?
- Are you caring for someone with dementia in the later stages?
- Have you previously cared for someone with dementia?

What is the project about?

This study will explore the differences in the experiences of people with dementia and their carers from the above ethnic groups. This includes what better care at the later stages of dementia would look like, what helps or prevents this, and how healthcare services can support this.

What does the project involve?

You will take part in an interview about care at the later stages of dementia. This could be the care you would like to receive in the future as a person with dementia, or the experiences you have had as someone who is, or was, caring for someone with advanced dementia. You will receive a £10 gift voucher as a thank you for your time.

How can I take part?

If you are interested or want to know more, please contact the researcher directly using the details below.
