

# IMPROVING ACCESS AND CARE FOR SOUTH ASIANS WITH PSYCHOSIS

We would like to invite you to take part in a group discussion if you were born in, or trace your ancestry to, a country in South Asia

In the discussions, we will talk about getting involved in health research.

We want to know more about what you think about health research and what kinds of things researchers can do to make it easier for you to be involved.

## WANT TO TAKE PART?

Discussions will take place in a community workshop

If you would like to hear more about the study, contact Aneesa Khan (researcher) on [aneesa.khan@lscft.nhs.uk](mailto:aneesa.khan@lscft.nhs.uk) or 07483103073

Anyone taking part will be reimbursed for their time as a thank you for contributing to our research.
