WORKING WELL

DOING THINGS DIFFERENTLY
FOR GREATER MANCHESTER

Do you work with disabled people, people with long term health conditions or people enduring mental health conditions? The Working Well: Individual Placement and Support in Primary Care (WW:IPSPC) programme can provide your client or patients with tailored support to help them gain sustainable employment, return to work or help prevent them from falling out of work due to ill health.

Through our service, individuals will be supported at their own pace with the following support:

- Rapid job search which focuses on helping to find the RIGHT job
- Personalised job search based on the assessment of skills and abilities
- CV writing and review, tailored to specific job goals
- Benefits advice
- Self-employment advice
- Working alongside health professionals to ensure that the individuals health is a priority
- Working closely with employers to help them understand and cater for specific needs
- We can act as an intermediary, contacting the employers individuals want to work for on their behalf
- Offering career opportunities and advice
- Job interview preparation and advice
- Aftercare after the client has returned to work

WW:IPSPC is here to help individuals to focus on their own strengths, skills and abilities, to overcome any barriers preventing them from thriving in sustained employment. We're aware that no two clients are the same, and each of them will be supported in a way that works uniquely for them.
